quick meeting

# bistrot

A completely new concept for public seating. Ideal for a quick meeting, a snack, or to send messages from your laptop, the increased seating area is truly comfortable, even when you're wearing a suit. Thanks to its compact size, it's suitable even for tight spaces. In combination with a table it can be used to create an interesting set-up for outdoor refreshment. With a rugged steel frame and a seating area or table top made from high-pressure laminate, it optionally can be decorated with a pattern or graphic design.

*The galvanized steel frame is coated with enamel; the seat and table top are from high-pressure laminate. Anchoring is below the pavement.*
