# rivage

An entirely new category of deck chairs in public spaces. This simple solid frame with a strong elegant profile carries lamellas of solid wood. This is ideal for additional seating items in places where people relax in public space. Parks, public gardens, embankments, relaxation areas of school campuses, terraces of hotels. All these places can now be enriched with this new item, whether firmly anchored to the ground or mobile.

*A galvanized steel supporting frame treated with powder paint coating. The seat and backrest are made of solid wood lamellas, which are hidden and yet firmly attached to the supporting frame. The deck chairs can be elegantly anchored into the ground with threaded rods or, fitted with adjustable stainless steel legs to stand freely on desktop.*
